Don Freed, who claims to have been working on or to have been in some kind of contact with the SLA, said yesterday that Cinque has been identified as a dangerous psychopath, perhaps a man charged with or known to have committed murder, by the New Jersey police. There was road noise as we were driving and I did not get the exact words, although the meaning was clear enough, so I didn't ask him to repeat. There was the import that he and whoever his associates on this may be do not regard SLA as revolutionary, if not the implication that they have suspicions about who the SLA people are and serve.
